

BRENDAN BECK

Cloud Infrastructure Engineer

Oregon City, OR • Brendan.beck62@gmail.com • BrendanBeck.com
github.com/brendanbeck62

PROFESSIONAL SUMMARY

Experienced Cloud Infrastructure Engineer with strong full-stack development background. Proven expertise in architecting and maintaining enterprise-scale infrastructure, container orchestration, and dev-ops best practices. Passionate about infrastructure automation, security, and building scalable systems.

PROFESSIONAL EXPERIENCE

Senior Cloud Infrastructure Engineer

Nov 2021 – Present

Nike

- Build and maintain Foundation Ubuntu Machine Images, supporting 60,000 concurrent instance deploys
- Build and maintain Foundation debian-slim docker container images, supporting 5,000 weekly ECR uploads
- Build and maintain 25 debian packages to customize the Ubuntu images as a part of the application AMI bake
- Introduce performance benchmarking, unit tests via rspec using serverspec, and integration tests in the form of automated sample app deployment and automated testing
- Introduce security standards by aligning to CISCAT's cis-benchmarks and automated testing using the Pro Assessor
- Core contributor to innersourced standardized groovy jenkins pipelines
- Serve as primary L3 support for Foundation Images users
- A member of the "Cloud Center of Excellence", a cross-functional team dedicated to establishing cloud best practices
- Routinely coordinate with Cloud Governance and Corporate Information Security teams

Software Engineer

Jan 2019 – May 2020

TZ Medical (Senior Capstone Project)

George Fox University

- Automated firmware testing processes for Clarus series ambulatory cardiac monitors
- Led cross-functional team of Computer Science and Computer Engineering students in capstone project
- Architected and implemented full-stack system redesign with Python Flask backend and Vue.js frontend
- Served as primary technical liaison between development team and client stakeholders, managing requirements and deliverables

Website Administrator & Graphic Design Intern

Jun 2018 – Aug 2018

DesignPort Inc

- Managed website administration and content management in WordPress for 5 startup companies under DesignPort umbrella

NOTABLE PROJECTS

Personal Server Infrastructure & Homelab

- Fully automated Proxmox environment using Ansible and Shell Scripting
- Deployed and configured WireGuard VPN server for secure remote network access with certificate management
- Orchestrated Kubernetes cluster for running distributed microservices
- Managed network with openSense and dynamic dns resolution
- Implemented monitoring and logging infrastructure with Grafana, Prometheus, InfluxDB, and Node Exporter

Docker Clone Implementation ("mockr")

- Developed fully functional Docker implementation from scratch to understand the fundamentals of containerization
- Implemented container isolation, filesystem management, and resource constraints

EDUCATION

Bachelor of Science in Computer Science

Spring 2020

George Fox University, Newberg, OR

Major: Computer Science with Cyber Security concentration

Minor: Marketing with focus on Digital Marketing

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, ECS, EKS, Lambda, DynamoDB, S3, IAM, CloudFormation), Terraform, Infrastructure as Code, Networking

Container Technologies: Docker, Docker Compose, Kubernetes, Container Registry, Image Optimization

Programming Languages: Python, Java, HTML/CSS, Bash scripting

Web Development: Node.js, Express.js, Vue.js, RESTful APIs, Microservices Architecture, Full-stack Development

DevOps & CI/CD: Jenkins, Github Actions, Automated Testing, Build Automation, Release Management, Git

Security: Wireshark, Splunk, Burp Suite, Metasploit, Ghidra/IDA, Network Analysis, IAM, Encryption

Operating Systems: Linux, Ubuntu (Preferred), macOS, System Administration

Design & Tools: Adobe Creative Suite (Photoshop, Illustrator, InDesign), UI/UX Design
